## Read the passage and answer the Questions from 11 to 15

Have you ever been at sea in a dense fog, when it seemed as if a tangible white darkness shut you in, and the great ship, tense and anxious, groped her way toward the shore with plummet and sounding line, and you waited with beating heart for something to happen? I was like that ship before my education began, only I was without compass or sounding-line, and had no way of knowing how near the harbor was. "Light! Give me light!" was the wordless cry of my soul, and the light of love shone on me in that very hour.

11 నుండి 15 వరకు గల ప్రశ్నలకు సంబంధించిన పాఠ్యభాగం ఈ క్రింద ఇవ్వబడినది. దానితో పాటు 5 బహుళ ఐచ్ఛిక ప్రశ్నలు ఇవ్వబడినవి. సరైన జవాబు ఎంచుకొని రాయండి.

మీరు ఎప్పుడైనా దట్టమైన పొగమంచులో సముద్రంలో ఉన్నారా? ఒక స్పష్టమైన తెల్లని చీకటి మిమ్మల్ని మూసివేసినట్లు అనిపించినప్పుడు, ఒక గొప్ప ఓడ తన సౌండింగ్ లైన్ తో వేగంగా ఒడ్డుకు చేరు కుంటున్నప్పుడు, మీ హృదయం వేగంగా కొట్టుకుంటూఉండగా ఏదైనా జరుగుతుందేమో అని ఆత్రంగా వేచి ఉన్నారు. నా విద్యాభ్యాసం ప్రారంభానికి ముందు నేను ఆ ఓడలా ఉండేవాడిని. నేను దిక్కుచి లేదా సౌండింగ్ లైన్ లేకుండా ఉన్నాను మరియు నౌకాశ్రయం ఎంత సమీపంలో ఉందో తెలుసుకునే మార్గం లేని పరిస్థితి లో ఉన్నాను. "వెలుగు! నాకు కాంతిని ఇవ్వ!" అనే పదాలు లేని ఏడుపు తో నా ఆత్మ బాధ పడింది. అదే సమయంలో ప్రేమ అనే కాంతి నా పై ప్రకాశించింది.

**Read the passage given below and answer the questions 96 to 100.**

Libraries have experienced dramatic changes in the last several years as a result of COVID and other external forces. As librarians look ahead to the future, here are a few key trends that will shape their needs going forward. The shift to digital services and delivery models is enhancing access but creating new challenges for libraries. The emergence of COVID-19 has greatly accelerated this trend, while also demonstrating the value in transitioning from print to digital resources. Accessing content and services digitally is more convenient for many patrons, and the shift toward digital delivery is likely to continue as libraries look toward the future. Yet, navigating the complex licensing (and tricky economics) of acquiring electronic content and digitizing existing materials isn't easy.

For instance, libraries need an easy way to administer different licensing agreements and lending policies for various publishers and e-books. If they digitize their print collections, they'll need a way to limit the lending of digital files according to best practices in controlled digital lending (CDL) to avoid running afoul of copyright restrictions. Having the right technologies in place allows libraries to manage these complex processes effectively.

Rising expectations are prompting libraries to improve the patron experience. Today's customers expect more personalized and immediate service than ever before. Consumers' rising expectations are influencing how patrons want to be able to interact with library services as well. The shift to digital services and delivery models is one way that libraries are responding to changing expectations among patrons. But libraries are also looking for other ways to improve the experience for their users, such as by making it easier to find and check out materials that match users' needs and interests.

Users want to be able to find what they need quickly and easily from whatever environment they are using, whether that's a mobile device or even a learning management system if they're enrolled in a course. Users also want to receive services in the format of their choice. The digital platforms that libraries use to manage their operations must be able to support these capabilities.

As librarians are increasingly asked to do more with less, automation will play a key role in helping them achieve this goal. Streamlining workflows using automation and artificial intelligence isn't just a cost-saving measure; it can also free up librarians to spend more time interacting with patrons and providing other services that demonstrate real value to stakeholders. The right technologies can also help librarians make better decisions about where to spend their limited resources, so they get the most impact from their investment. For instance, instead of acquiring books or digital materials that are likely to have a very narrow appeal, would it make more sense to partner with other libraries through a resource-sharing network?

The use of a platform with built-in analytics can help librarians make smarter decisions when evaluating purchases or assessing the impact of programs and services, so they can serve the needs of stakeholders more effectively. The right digital platform can accelerate innovation and keep libraries one step ahead of whatever challenges the future might hold.
